**Publishing note: Verify official award titles, publication metadata, role dates, and public links before publishing. Do not add unverified statistics or credentials.**

## SECTION 1 — EXECUTIVE BIOGRAPHY

### About Engr. Umair Iftikhar

Engr. Umair Iftikhar is a technology leader, software engineer, entrepreneur, and digital transformation professional with a strong interest in building innovative digital solutions and using technology to create meaningful impact. He serves as CTO & Co-Founder of i3 Group of Companies and Chief Operating Officer (COO) at Youth Empowerment Training Program (YETP), contributing to technology development, organizational operations, digital initiatives, and youth empowerment.

He holds a Bachelor of Science in Computer Engineering from The University of Lahore, where his academic background established a foundation in engineering, computing, and technology-driven problem-solving. His professional expertise includes web application development, React.js, Node.js, digital platforms, technology strategy, digital marketing, and IT training.

Throughout his professional journey, Umair has contributed to initiatives associated with Hunarmand Punjab and Cyber Secure Pakistan, working across technology-enabled education, digital skills development, and cybersecurity-focused initiatives. He has also worked on web development projects and supported corporate-sector training, combining technical knowledge with practical implementation and knowledge sharing.

His research paper, *IoT Based Monitoring and Control in Smart Farming*, was published in connection with the Mohammad Ali Jinnah University International Conference on Computing (MAJICC) in 2021, reflecting his academic interest in connected technologies and smart agricultural systems.

His professional journey also includes receiving recognition as a CTO from former Governor of Punjab Chaudhary Muhammad Sarwar in 2020 and recognition at a Cyber Secure Pakistan conference involving Jang Media Group and the Federal Minister for IT.

Umair believes that successful technology leadership requires more than technical expertise. It requires strategic thinking, accountability, collaboration, and the ability to translate ideas into practical solutions. His vision is to contribute to a digitally empowered future through software innovation, technology leadership, education, and opportunities for the next generation.

## SECTION 2 — LEADERSHIP PHILOSOPHY

### Leadership Through Innovation, Ownership & Execution

My leadership philosophy is built on the belief that technology should solve real problems, create opportunities, and deliver measurable value. As a technology professional and business leader, I believe that the strongest results come from combining technical expertise with strategic thinking, responsible decision-making, and effective teamwork.

I approach challenges with a problem-solving mindset, focusing on understanding the underlying requirements before selecting the right technology or solution. Whether working on software development, digital platforms, business operations, or training initiatives, I value practical execution over ideas that remain on paper.

I believe in empowering teams through clear communication, shared responsibility, continuous learning, and a culture where people are encouraged to contribute ideas and improve their skills. Effective leadership means taking ownership of decisions, learning from challenges, and maintaining a clear direction while remaining adaptable to change.

For me, innovation is not simply about adopting the latest technology. It is about identifying where technology can create genuine value, improve efficiency, strengthen organizations, and open new possibilities.

My goal is to build technology-driven solutions, support capable teams, and contribute to initiatives that create sustainable value for businesses and society.

### My Leadership Principles

- **Think Strategically:** Align technology decisions with long-term goals and real-world needs.
- **Execute with Ownership:** Take responsibility for decisions, implementation, and outcomes.
- **Innovate with Purpose:** Use technology to solve meaningful problems rather than follow trends blindly.
- **Build Strong Teams:** Encourage collaboration, communication, and continuous professional development.
- **Lead Through Learning:** Stay adaptable, explore new technologies, and improve through experience.

## SECTION 3 — MISSION & VISION

### My Mission

My mission is to build practical, scalable, and innovative digital solutions that help organizations grow, improve operational efficiency, and adapt to an increasingly technology-driven world.

Through software engineering, technology leadership, digital transformation, and IT education, I aim to connect technical innovation with real business and social needs. I also believe in creating opportunities for young people to develop relevant digital skills and participate in the evolving global technology ecosystem.

### My Vision

My vision is to contribute to a future where technology, education, and entrepreneurship work together to create sustainable progress.

I aspire to help build technology-driven organizations, develop digital platforms that solve meaningful problems, support the growth of skilled technology professionals, and encourage innovation across industries.

By combining engineering knowledge with leadership and execution, I aim to contribute to a stronger digital ecosystem in Pakistan and support opportunities that extend beyond geographical boundaries.

### What Drives Me

- Building technology that solves real-world problems.
- Turning ideas into functional and scalable digital products.
- Connecting engineering, business strategy, and innovation.
- Supporting digital skills development and youth empowerment.
- Encouraging continuous learning and professional growth.
- Creating long-term value through responsible technology leadership.

**My belief: The real value of technology lies not only in what we build, but in the problems we solve and the opportunities we create.**

## SECTION 4 — VALUES & WORKING PRINCIPLES

### The Principles Behind My Work

### 1. Integrity & Accountability

I believe in taking ownership of responsibilities, communicating honestly, and maintaining professional standards. Trust is built through consistent actions, transparency, and accountability.

### 2. Innovation & Problem-Solving

I approach challenges with curiosity and a practical mindset. My focus is on understanding problems, exploring appropriate technologies, and developing solutions that serve a clear purpose.

### 3. Collaboration & Teamwork

Meaningful progress requires people with different skills and perspectives to work together. I value clear communication, mutual respect, and collaborative problem-solving.

### 4. Continuous Learning

Technology evolves constantly. I believe that remaining effective requires continuous learning, adapting to new tools and methods, and improving both technical and leadership capabilities.

### 5. Impact & Execution

Ideas create value when they are implemented effectively. I focus on translating plans into practical outcomes that support organizational objectives, improve processes, and create opportunities for others.

## SECTION 5 — EDUCATION & DEVELOPMENT

### Academic Foundation

**Bachelor of Science in Computer Engineering**
**Institution:** The University of Lahore

My academic background in Computer Engineering provided the foundation for my interest in software development, computing systems, engineering-based problem-solving, and technology innovation. It continues to inform my approach to evaluating technical challenges and developing digital solutions.

### Research & Academic Contribution

**IoT Based Monitoring and Control in Smart Farming**

- **Research area:** Internet of Things (IoT) and Smart Agriculture
- **Conference:** Mohammad Ali Jinnah University International Conference on Computing (MAJICC)
- **Year:** 2021
- **Publication:** Add the official IEEE Xplore record or DOI.

This research reflects an interest in applying connected technologies to monitoring and control systems and exploring how digital innovation can support practical industry applications.

### Professional Development

My professional development has also been shaped by hands-on involvement in technology projects, digital initiatives, operational responsibilities, and knowledge sharing.

Key areas of ongoing professional development include:

- Modern web development using React.js and Node.js.
- Software engineering and digital platform development.
- Technology strategy and digital transformation.
- Digital marketing and technology-enabled business growth.
- IT training, corporate learning, and knowledge sharing.
- Emerging technologies and practical innovation.

### Professional Development Philosophy

I believe learning does not end with a degree. Practical experience, experimentation, collaboration, and continuous improvement are essential to remaining effective in a rapidly changing technology landscape.

*Additional degrees, certifications, courses, and professional training should be listed only where verified.*

# INFORMATION TO COLLECT FROM THE CEO

## 1. Professional Identity

- Full approved name: Engr. Umair Iftikhar
- Preferred title: CTO & Co-Founder | COO | Technology Leader
- Current organizations and exact role titles
- Preferred writing style: First person (“I”) or third person (“he”).

## 2. Career Background

- Employment and leadership dates
- Previous professional positions
- Career origin story
- Two or three defining professional milestones
- Specific responsibilities and contributions in each organization

## 3. Leadership & Vision

- Personal leadership experiences
- Long-term professional goals
- Examples of technology solving practical problems
- Personal views on innovation, teamwork, and accountability

## 4. Education & Qualifications

- Exact degree title and graduation year
- Institution details
- Verified certifications and professional development courses
- Official research publication link

## 5. Awards & Recognition

- Official award titles
- Award dates and awarding authorities
- Certificate scans and approved photographs
- Event details and supporting links

## 6. Professional Profiles

- LinkedIn profile
- GitHub profile
- Official organization websites
- Approved professional email address

# REQUIRED ASSETS

## 1. Professional Executive Portrait

A high-quality professional photograph suitable for the About page and homepage. Prefer a clean background, professional attire, natural lighting, and a confident but approachable expression.

## 2. Leadership & Working Photographs

Authentic photographs from technology projects, professional meetings, training sessions, conferences, or organizational activities. Use only photographs that are approved for public display.

## 3. Education & Research Assets

- University or graduation photographs, if available.
- Official IEEE publication link or DOI.
- Research paper cover or conference presentation photograph.
- Verified academic and professional certificates, where appropriate.

## 4. Awards & Recognition Assets

- CTO recognition award from 2020.
- Photograph or certificate from the Cyber Secure Pakistan conference.
- Relevant event photographs and verified award details.

## 5. Organization & Project Assets

- i3 Group of Companies logo.
- YETP logo.
- Hunarmand Punjab logo.
- Cyber Secure Pakistan logo.
- Approved project screenshots and links.

## 6. Personal Branding Assets

- Consistent professional headshot.
- Personal logo or monogram, if desired.
- Approved brand colors and typography.
- LinkedIn and GitHub links.

# CLOSING STATEMENT

## Engineering Ideas. Leading Innovation. Creating Impact.

I believe that meaningful progress happens when engineering expertise, strategic leadership, and a clear sense of purpose come together.

My professional journey continues to be driven by the opportunity to build useful technology, solve challenging problems, support people through learning, and contribute to a more innovative digital future.

I welcome opportunities to connect with technology professionals, entrepreneurs, organizations, and teams who share an interest in building meaningful digital solutions and creating long-term value.

**Let’s connect and explore what we can build together.**
